

README

To perform the testing:

- Run Eclipse Scala IDE
- Import the project Al-Ogaili_AbuHijleh-4ME304
- In Eclipse Scala IDE>Run Configurations>Arguments and include the required testing parameters.
- Run FeatureExtractor.scala and/or KMeansCluster.scala as scala application
- End Session.

To check the features-tweets.json and results.json go to features/kmeans folders>open json files with Notepad++
